Business Policy

regarding the provision of services involving the exchange of crypto-assets for funds or other crypto-assets

MP Developers s.r.o.

Version as of 1 July 2026

1. Introduction and Purpose of the Document

In this document, MP Developers s.r.o. (hereinafter referred to as the "**Provider**") publishes the Business Policy of the Crypto-Assets Exchange Services on the Anycoin Platform (hereinafter referred to as the "**Platform**"), in accordance with Article 77(1) and (2) of the Regulation.

The terms used in this Business Policy and the pricing methodology have the meanings defined in the Anycoin Platform Terms and Conditions (hereinafter referred to as the "**Terms and Conditions**") and the Platform Services Agreement (hereinafter referred to as the "**Platform Services Agreement**").

In the event of a conflict between this Business Policy and the pricing methodology, and the Terms and Conditions or the Platform Services Agreement, the Terms and Conditions and the Platform Services Agreement shall prevail.

All information provided in this manner will remain valid for the duration of the Platform Services Agreement, or during the period of validity of the relevant version of the Business Policy and pricing methodology, should these documents be amended during the term of the Platform Services Agreement.

2. Business Policy and Client Access to the Exchange

The Provider makes the Platform available to Clients 365 days a year, 7 days a week, 24 hours a day, except in cases of necessary technological downtime. The use of the Platform is free of charge for users. In order to use the Platform, including the Exchange Service, a Platform Services Agreement must be concluded. The Provider does not discriminate against any Client in terms of accessibility to the Platform.

The Provider shall make the Crypto-Asset Exchange Service available and allow Orders to be placed by all Clients who:

a) are authorised to use the Services via the Platform;

b) have familiarised themselves with the Business Policy and the pricing methodology;

c) use the Custody and Administration Service, if the Company is to use the Company's Wallet to deliver or obtain the Client's crypto-assets under the Client's Order as part of the Custody and Administration Service.

The Provider does not apply any specific rules for market makers and/or liquidity providers, treating these entities like other Clients.

For operational reasons and on a non-discriminatory basis, the Provider may restrict Clients' Orders and transactions in terms of their volume, frequency, or the specified rate, including the minimum and maximum amounts of crypto-assets to be exchanged as stated in the Order and expressed in the relevant currency.

<u>Business Day</u>

By default, a Business Day is each calendar day from 00:00 to 23:59 CET. Any changes to the Business Day or its schedule are subject to the Provider's approval. During Business Days, Clients are entitled to place Orders via the Platform, and Providers are obliged to execute these Orders.

3. Methodology for determining the price of crypto-assets

Fixed price of crypto-assets

As part of the Exchange Service, the Provider uses the **fixed price** principle to determine the price of crypto-assets available for Exchange **through the exchange rate list.**

The determined price of a crypto-asset is derived from the price at which the Provider is able to procure the crypto-asset in question for its own account and includes the Provider's margin.

Market factors such as Order volume or the volume of crypto-assets being exchanged, as well as market volatility, affect the price at which the Providers can acquire a crypto-asset in question for its own account, and these factors are reflected in the set price (rate) of the crypto-asset. However, the set price does not depend directly on these factors; it is always determined based on the exchange rate list as a fixed price.

The announced price is final for the Client. The Client does not pay any fees for the execution of the Order or the conclusion of the transaction.

Publication of the exchange rate list

In accordance with the relevant legal regulations, the Provider publishes and continuously updates the exchange rate list during the Business Day via the publicly accessible part of the platform, i.e. a set of prices for individual crypto-assets announced by the Provider and available for Exchange. The Provider provides the exchange rate list free of charge.

Disclosure of the fixed price of crypto-assets when placing an Order

The Provider displays the announced rate of the relevant crypto-asset at the time the Order is placed to the Client in the Client Account, and this is the relevant rate for the respective Order.

In accordance with its Business Policy, the Provider may apply deductions and surcharges to the announced rate according to the previous paragraph on a case-by-case basis in relation to individual Clients, based on non-discriminatory criteria, particularly depending on the volume of the Orders and transactions placed by the Client over a predetermined period, usually the last 30 days, or the method used to access the Platform (directly or via a third party). The Provider informs Clients of the possibility to apply a discount or surcharge via the Terms and Conditions and the Tariff, available on the Platform's website.

4. Governing law and jurisdiction

The governing law in the event of any dispute between the Client and the Provider is Czech law. The jurisdiction of the court for dispute resolution is governed by the legal provisions governing jurisdiction under Czech law.
