Summary of Rules for Executing Orders under the Best Conditions

MP Developers s.r.o.

Version as of 1 July 2026

1 Introduction and Purpose of the Document

In this document, MP Developers s.r.o. (hereinafter referred to as the "**Provider**") summarises the principles and procedures for executing Orders for Clients under the best conditions in connection with the Execution of Orders Service relating to crypto-assets, in accordance with Article 78(3) of the Regulation. Through these principles and procedures, the Company ensures that Client Orders are executed promptly, correctly, transparently and in accordance with their best interests.

The terms used in this Summary of Rules for Executing Orders under the Best Conditions have the meanings defined in the Anycoin Platform Terms and Conditions (hereinafter referred to as the "**Terms and Conditions**") and the Platform Services Agreement (hereinafter referred to as the "**Platform Services Agreement**").

In the event of a conflict between this Summary of Rules for Executing Orders under the Best Conditions, and the Terms and Conditions or the Platform Services Agreement, the Terms and Conditions and the Platform Services Agreement shall prevail.

All information provided in this manner will remain valid for the duration of the Platform Services Agreement, or during the period of validity of the relevant version of the Summary of Rules for Executing Orders under the Best Conditions, should this document be amended during the term of the Platform Services Agreement.

2 Information about the selection of trading platforms

The Provider executes Client Orders relating to crypto-assets on trading platforms selected based on the following criteria:

a) the nature and registered office of the trading platform,
b) conditions of custody of crypto-assets,
c) the good name of the trading platform,
d) fulfilment of information obligations by the Platform,
e) speed of order execution,
f) the offer of required currency pairs,
g) liquidity of trading platforms,
h) technical availability of the trading platform,
i) fees and costs related to order execution and other related costs and fees.

The trading platform must always meet the criteria under points (a) to (e), and failure to meet any of these criteria will result in its exclusion from the pool of platforms that may be used.

The criteria under points (f) to (i) are assessed by the Provider according to their relative weights; failure to meet any of these criteria, or receiving a low score for an individual criterion, will affect the overall assessment of the trading platform but will not result in its exclusion from the pool of platforms that may be used.

3 Currently used trading platforms

The Provider currently uses the following trading platforms for the execution of orders:

Trading platform brand	**Operator**
Dase	MP Developers s.r.o.

Kraken	Payward Europe Solutions Limited

The Provider does not execute Orders on trading platforms other than those specified in this article, nor outside any regulated markets (so-called Over-the-counter).

4 Criteria for selecting a trading platform on which to execute an Order

In order to determine the trading platform with the best conditions for executing a specific Client Order, the Provider takes into account the following criteria:

a) the probability of executing the Order,
b) the price, including all costs and fees related to executing the Order.

5 Rewards, discounts and non-monetary benefits

The Provider does not accept any rewards, discounts or non-monetary benefits for including a trading platform in its pool of used trading platforms or for selecting a platform on which to execute Orders.

6 Selection of trading platform by the Client

The Provider does not allow Clients to specify a particular trading platform for executing an Order.

7 Aggregation of Orders

The Provider does not aggregate Client Orders with Orders received from other Clients or with Orders executed on its own account.

8 Monitoring and regular evaluation

The Provider continuously monitors the application of the adopted rules and procedures for executing Orders under the best conditions, and evaluates their effectiveness and relevance at least once a year.

If the Provider determines that the trading platforms used under Article 3 of this Summary of Rules for Executing Orders under the Best Conditions should be supplemented or replaced with other trading platforms on which Orders can be executed more efficiently, it will decide on further action and ensure that such a platform is included in the pool of trading platforms used.
